

Our Curriculum

Early Learning Academy (ELA) is a school which maintains an extremely high standard of caring and learning for pre-schoolers. Our curriculum is the Early Learning Academy® Full-Time All-Day Creative Curriculum in which our faculty demonstrates and then guides their students who experience and participate in hands-on activities that are used to enhance each child's learning experience. We ensure that our teachers explore all areas of learning for the children's specific growing needs such as **Math, Science, Literacy, Spanish, Sign Language, Yoga, Gymnastics, Arts & Crafts, Music, Dramatic Play, and Cooking.**

Year Long Goals

The goal is for every child to be ready to move on to the next learning phase of their lives. By that time, the children should know the entire alphabet (sounds and sight), recognize sight words (I, am, you, if, stop, etc.), know numbers 1-50, understand patterns, sequence, one-to-one correspondence, know colors and shapes, able to grip a pencil, able to write name, and gaining independence (including eating and dressing on their own). Some of the children do have a

Why I like ELA

My daughter after moving forward from ELA was tested in reading and writing one grade above her level Both my children love the school and the staff so much that they would fight me to let them go to school if I kept them home sick and even wished they could attend on weekends.

The teaching staff are very attentive to the children they treat the children like their own. they are always interacting with the parents updating them on what they did in the class if they had any struggles with a certain area they will let you know what it was and also what they will be doing to help your child improve. I was so impressed at how they structure each class to each individual child's need and that is why I enrolled my second child to attend this great school.

Home Corner

Home corner is another name for circle time. This is a crucial part of the school day because this is when the review of the entire day takes place with the students. Everyone gets together and we sing our good morning song and songs about the days of the week, the months of the year; we talk about the weather, and we have discussions about the topic of the week. We also review counting and sign the alphabet.

Arts and Crafts

Literacy/Math and centers: Literacy and math switch times every day, alternating mornings. During literacy, we will cover a different letter every week, practice sounds, learn sight words, tracing, and writing. Math lessons include counting, patterns, sequencing, one-to-one correspondence, introduction to telling time, and identifying money. Again, I will go over the topic as a whole group and then split them into groups. During centers, I will teach the topic as a group first, and then split up the students according to their groups. Each group will have work to complete that fits into the group they are in.

Cooking

ELA's cooking class will give children a sense of control and accomplishment, while they are involved in making choices throughout the cooking process. This cooking class will involve an array of subjects. Some things that can be learned from cooking include reading, math, history, shapes, colors, science, nature, vocabulary, art, health and nutrition.

Dance

Our Dance classes consist of an instructor teaching ballet, Indian and Modern dances. This ensures that the children learn, comprehend and grasp every step that is taught.

Music

Our music classes consist of teaching how to read and play music notes. Children will be taught how to play the piano, violin & so much more.

Yoga/Gymnastic

In yoga and gymnastics children learn techniques for self-health, relaxation, and inner fulfillment; they use the techniques to navigate life's challenges with a little more ease.

Spanish/Sign Language

ELA's language classes consist of a 30 minute language class. Students learn and grasp the languages by teaching the same words in both classes; the words learned in these language classes will also be learned throughout the academic school day.
